Dear [Redacted]

STAT

Many thanks for your letter of 19 December 1960. Although our technical people are familiar with [Redacted] developments in the enhancement field, we do appreciate alerts of this kind. The complexity and continuously changing picture in the field of science and technology make it impossible for us to be aware of all developments which may have a bearing on our work, and it is more than likely that a lead from an old friend may "strike pay-dirt." Thanks again.

Best Wishes,
